This event is being hosted by Stephenson Harwood LLP whose splendid offices at Finsbury Circus were designed by the famous architect Edwin Lutyens. We are grateful for their generosity. [Click here for directions:](#)

Special thanks to Stephenson Harwood for their generosity in hosting this training course.

The course is being run by the Margaret Pyke Trust, a charity that has been organising training for medical professionals in sexual and reproductive healthcare since 1969. The Trust has been approved as a provider of this training by the Faculty of Sexual and Reproductive Healthcare by whom the course was designed.

You might be interested to know that the Margaret Pyke Trust now has an active international programme and any surpluses generated from training UK clinicians supports this vital work. The Trust's vision is a world where everyone can decide freely whether, when, and how many children they want, for the benefit of all people and the planet, and so our growing focus is the 214 million women in developing countries with an unmet need for contraception.
